**Introduction**

Shuichi Matsumura & Peter Forster

## Part I  Out-of-Africa: Where was Paradise?

**Chapter 1** Where was Paradise? A Simulation Study of the Spread of Early Modern Humans in Heterogeneous Environments

Laurent Excoffier, Nicolas Ray & Mathias Currat

**Chapter 2** Worldwide Genetic Patterns in Human Population Genetics

Andrea Manica, Hua Liu, Franck Prugnolle & François Balloux

**Chapter 3** Following Populations or Molecules? Two Contrasting Approaches and Descriptive Outcomes of Island Colonization Arising from a Similar Knowledge-base

Stephen Oppenheimer

## Part II  What Simulations Tell Us About Complex European (Pre-)histories

**Chapter 4** Genetic Simulations of Population Interactions during Past Human Expansions in Europe

Mathias Currat, Laurent Excoffier & Nicolas Ray

**Chapter 5** A Combined Markov Chain Monte Carlo and Simulation-based Approach for Inferring the Colonization History of the British Isles

William Amos, Howsun Jow & Nigel Burroughs

**Chapter 6** Social Constraints on Interethnic Marriage/Unions, Differential Reproductive Success and the Spread of 'Continental' Y Chromosomes in Early Anglo-Saxon England

Mark G. Thomas, Heinrich Härke, Gary German & Michael P.H. Stumpf

## Part III  Human Dispersal from Asia

**Chapter 7** The Genetic Prehistory of Madagascar’s Female Asian Lineages

Peter Forster, Shuichi Matsumura, Matthieu Vizuete-Forster, Petya Belinda Blumbach & Robert Dewar

**Chapter 8** Modelling Male Prehistory in East Asia using BATWING

Yali Xue, Tatiana Zerjal, Weidong Bao, Suling Zhu, Qunfang Shu, Jiujin Xu, Ruofu Du, Songbin Fu, Pu Li, Matthew E. Hurles, Huanming Yang & Chris Tyler-Smith

**Chapter 9** Genetic Relationships of Human Populations in and around the Japanese Archipelago

Saitou Naruya

**Chapter 10** Reconstruction of the Prehistory of Greenland Eskimos from Genetic Data

Shuichi Matsumura & Peter Forster
Part IV  Methodological Challenges in Ancestral Inference
Chapter 11  Incorporating Environmental Heterogeneity in Spatially-explicit Simulations of Human Genetic Diversity
            Nicolas Ray, Mathias Currat & Laurent Excoffier 103

Chapter 12  Extreme Population Genetics on Islands
            Daniel Falush 119

Chapter 13  Ancestral Inference from Microsatellite Data by Sequential Importance Sampling in Subdivided Population Models
            Robert C. Griffiths & Yvonne J. Griffiths 125

Chapter 14  Joint Determination of Topology, Divergence Time and Immigration in Population Trees
            Mark A. Beaumont 135

Chapter 15  Estimating Human Demographic Parameters from Genomic SNP Data
            Rasmus Nielsen 155

Chapter 16  Demography, Ascertainment and the Genealogy of Haplotype Blocks
            Ian Wilson 161

Part V  Comments from Archaeologists
Chapter 17  Archaeology, Genes and Demographic Histories
            Stephen Shennan 173

Chapter 18  Population Structure and Diversity Indices
            James Steele 177

Chapter 19  Whither Archaeogenetics? A View from the Trenches
            Charles Higham 183

Part VI  Experimental Workshop: Do the Existing Methods Really Work?
Editor’s note on the workshop  Can We Really Read History from Genetic Data? 191

Chapter 20  Can We Read History from Haplotypes?
            Henry Harpending 193

Glossary 199
